

Test Report

·Filtering half masks to protect against particles

PERFORMED IN ACCORDANCE WITH:

⊠ EN 149:2001+A1:2009 Respiratory protective devices - Filtering half masks to protect against particles - Requirements, testing, marking

Test Report No.: R20200129

Tested by (name + function + signature)....: Alex He Test Engineer

Approved by (name + function + signature)...: Dyne Wang Laboratory Manager

Date of issue : Jul 2nd, 2020

Project No.: P20200152

Testing Laboratory Trust Right Testing and Certification Service (Zhongshan) Ltd.

Address No.28, Shangjian Road, Nantou Town, Zhongshan Guangdong

Testing Location...... Trust Right Testing and Certification Service (Zhongshan) Ltd.

Address No.28, Shangjian Road, Nantou Town, Zhongshan Guangdong

Applicant's name...... UNIVERSAL CERTIFICATION and SURVEILLANCE SERVICES Trade

Co.

Address

district, Foshan city Guangdong Province, China

Factory's name Same as manufacturer

Address Same as manufacturer

Test item description: Filtering half mask

Trade Mark N/A

Model/Type reference...... 9800A

Grade..... FFP2

Country of destination (code) N/A

Sample

Samples received on Jun 8th, 2020

Reference samples...... S20200MDT

Result.....: The test items PASSED/FAILED partially the test specification(s).

For detailed testing of items, please refer to the report and testing data.

Evaluation according to the test specification (standard)					
Abbreviations	P(ass) = passed F(ail) = failed N/A = not applicable N/T = not tested				
EN 149:2001+A1 Requirements, te	:2009 Respiratory protective devices - Filtering half mask sting, marking	s to protect against particles	-		
Clause	Requirements	Result/Comment	Verdict		
1	Scope				
2	Normative references				
3	Terms and definitions				
4	Description				
5	Classification Particle filtering half masks are classified according to their filtering efficiency and their maximum total inward leakage. There are three classes of devices:		Р		
	- FFP1		N/A		
	- FFP2	Designation is Grade FFP2.	Р		
	- FFP3		N/A		
6	Designation		Р		
	Particle filtering half masks meeting the requirements of this European Standard shall be designated in the following manner:				
7	Requirements		Р		
7.1	General		Р		
	All test all test samples shall meet the requirements.		Р		
7.2	Nominal values and tolerances		Р		
	Except for temperature limits, values which are not stated as maxima or minima shall be subject to a tolerance of \pm 5%. Unless otherwise specified, the ambient temperature for testing shall be(16-32)° C, and the temperature limits shall be subject to an accuracy of \pm 1° C		Р		
7.3	Visual inspection		Р		
	The visual inspection shall also include the marking and the information supplied by the manufacturer.	In accordance with requirement	Р		

	10011(0001)		
7.4	Packaging		Р
	Particle filtering half masks shall be offered for sale packaged in such a way that they are protected against mechanical damage and contamination before use.	In accordance with requirement	Р
7.5	Material		Р
	Materials used shall be suitable to withstand handling and wear over the period for which the particle filtering half mask is designed to be used. After undergoing the conditioning described in 8.3.1 none of the particle filtering half masks shall have suffered mechanical failure of the facepiece or straps. Three particle filtering half masks shall be tested. When conditioned in accordance with 8.3.1 and 8.3.2 the particle filtering half mask shall not collapse. Any material from the filter media released by the air flow through the filter shall not constitute a hazard or nuisance for the wearer.	No mechanical failure after undergoing the conditioning described in 8.3.1. No collapse when conditioned in accordance with 8.3.1 and 8.3.2.	Р
7.6	Cleaning and disinfecting	Single shift use only.	N/A
7.7	Practical performance		Р
	The particle filtering half mask shall undergo practical performance tests under realistic conditions. These general tests serve the purpose of checking the equipment for imperfections that cannot be determined by the tests described elsewhere in this standard. Where practical performance tests show the apparatus has imperfections related to wearer's acceptance, the test house shall provide full details of those parts of the practical performance tests which revealed these imperfections.	No imperfections.	Р
7.8	Finish of parts		Р
	Parts of the devices likely come into contact with the wearer shall have no sharp edges or burrs.	No sharp edges or burrs.	Р

	lest Report		
7.9	Leakage		Р
7.9.1	Total inward leakage		Р
	The laboratory tests shall indicate that the particle filtering half mask can be used by the wearer to protect with high probability against the potential hazard to be expected. The total inward leakage consists of three components: face seal leakage, exhalation valve leakage (if exhalation valve fitted) and filter penetration. For particle filtering half masks fitted in accordance with the manufacturer's information, at least 46 out of the 50 individual exercise results (i.e. 10 subjects x 5 exercises) for total inward leakage shall be not greater than 25 % for FFP1 11 % for FFP2 5 % for FFP3 and, in addition, at least 8 out of the 10 individual wearer arithmetic means for the total inward leakage shall be not greater than 22 % for FFP1	Meeting requirement of 11 % for FFP2 Meeting requirement of 8 %	P
	8 % for FFP2 2 % for FFP3	for FFP2 Detail refer to table 1	
7.9.2	Testing shall be done in accordance with 8.5. Penetration of filter material		Р
1.5.2	The penetration of the filter of the particle filtering half mask shall meet the requirements of Table 1. Table 1 — Penetration of filter material Classification Sodium chloride test 95 l/min Max. Paraffin oil test 95 l/min Max. Peretration of test aerosol Sodium chloride test 95 l/min Max. Peretration of test aerosol Sodium chloride test 95 l/min Max. Peretration of filter material A total of 9 samples of particle filtering half masks shall be tested for each aerosol.	Detail refer to table 2	P
7.10	Compatibility with skin		Р
	Materials that may come into contact with the wearer's skin shall not be known to be likely to cause irritation or any other adverse effect to health.	No irritation or any other adverse effect to health.	Р
7.11	Flammability		Р
	The material used shall not present a danger for the wearer and shall not be of highly flammable nature.	Detail refer to table 3	Р

			iest R	eport	-
